

Tower Weekly Production Report

Period: 2026-03-04 18:00 to 2026-03-11 18:00

Generated: 2026-03-13 08:47:04

Executive Summary

Done draws	0
Unique projects	0
Unique preforms	0
Total required length (m)	0.00
Avg draw speed (m/min)	0.00
Argon used (SL)	0.00
Gas weighted avg flow (SLPM)	0.00
SAP sets used	0
SAP sets in stock (current)	8
Maintenance actions (period)	1
Faults opened / closed (period)	0 / 0
Open critical faults (now)	1
Next-week scheduled events	1

Draws Completed

Top projects by done draws

No data

Latest completed draws

No data

Argon Gas Consumption

Logs used	0
Total minutes	0.00
Total Argon (SL)	0.00
Weighted Avg Flow (SLPM)	0.00
Avg Argon per draw-log (SL)	0.00

Top gas-consuming logs in period

No data

SAP Rods Usage

SAP sets used in period	0
Current SAP sets in stock	8

SAP usage events (from inventory notes)

No data

Maintenance Report

Maintenance actions in period	1
-------------------------------	---

Latest maintenance actions

timestamp	component	task	actor	note
2026-03-06 11:56	UV Curing System	Every 500 operating hours: clean lamp module, reflector, bulb and RF screen	operator	

Faults Report

Faults opened in period	0
Fault actions closed in period	0
Open faults now	1
Open critical faults now	1

Recent faults

No data

Recent fault actions

No data

Next Week Schedule

Planned events for the coming 7 days

event_type	start	end	description	recurrence
Maintenance	2026-03-19 08:00	2026-03-19 16:00	WEELEND REGULAR MAINTANANCE	Weekly

Consumables Snapshot

updated_at	A_level_kg	B_level_kg	C_level_kg	D_level_kg	A_type	B_type	C_type	D_type
2026-03-06 19:17:36	1.10	0.50	0.70	3.00	DP-1032	DS-2015	Coating_OF_136	Coating_KS_2-002

Notes: Gas is calculated from Furnace MFC1-4 Actual in logs with capped dt integration.
